## Clin notes

### IRON STUDIES

Request Number	24542650	10854820
Date Collected	9 Feb 24	28 Sep 24
Time Collected	09:54	10:42
Specimen Type: Serum		
Iron (10-30)	umol/L	27
T'ferrin(32-48)	umol/L	38
T. Sat. (13-45)	%	36
Ferritin(30-165)	ug/L	<b>18</b>
		<b>29</b>

Although the transferrin saturation is normal, the mildly reduced ferritin suggests iron deficiency.

During the reproductive years, iron deficiency in women is usually due to multiparity or heavy menstrual losses. Investigation of the gastrointestinal tract for a source of blood loss may be indicated.

### SURGERY USE

Normal

No Action/File
